

Application

Model DFD-210 is a dynamic rated multi-blade fire damper with 3V style blades. The DFD-210 may be installed vertically (with blades running horizontal) or horizontally and is rated for airflow in either direction.

This model has a manual quadrant which allows the DFD-210 to function as both a fire damper and a manual balancing damper.

Transitioned Damper Dimensions

When a fire damper is being used in conjunction with round or oval ductwork, the DFD-210 can be supplied in a factory sleeve with round or oval transitions on both ends of the sleeve. Dampers should be ordered to the duct dimensions. Drawings below show overall damper size.

*These dimensions are furnished approximately $\frac{1}{4}$ in. (6mm) undersize, except round and oval dimensions which are approximately $\frac{1}{8}$ in. (3mm) undersize.

Damper Sleeve Dimensional Data

The drawings below and corresponding table show the position of the DFD-210 damper when mounted in a factory sleeve ("A" dimension). The standard mounting locations provide enough space for the mounting of manual quadrant(s) and allow space for installation of retaining angles and duct connections. The following options may affect the range of available mounting locations: transitions, security bars, grille tabs.

The standard location of a damper mounted in a factory sleeve ("A" dimension) is shown below. The damper can be positioned at other locations within a range of 7 3/16 in. (183mm) to 16 in. (406mm) for the "A" dimension.

Sleeve

Sideplate

in. (mm)	"A" Dimension		
	Sleeve Std	Sleeve Max	Sideplate
Dampers with no OCI	7 3/16 in. (183)	16 (406)	6 3/16 (157)
Height < 11 in. (279) with OCI	12 (305)	16 (406)	12 (305)
Height ≥ 11 in. (279) with OCI	7 3/16 in. (183)	16 (406)	6 3/16 (157)

NOTE: Entire damper frame is not required to be installed within the wall. The damper blades, when closed should be contained within the wall.

Multiple Section Dampers

Dampers larger than maximum single section size are supplied as a factory assembly of two or more sections of equal size. The following figures show maximum damper section size and assembly configurations for multi-section dampers.

Two sections

4 Sections wide
2 sections high
