

Application

The ICD-44 is a low leakage thermally insulated damper with extruded airfoil blades. ICD-44 features broken blade which minimized the transfer of thermal energy and reduce condensation. It's also IECC (International Energy Conservation Code) compliant with a leakage rating of 3 cfm/ft2 @ 1 in. wg (55 cmh/m2 @ .25 kPa) or less.

Note Regarding UV Lights:

The dampers should not be mounted or stored in direct line of sight to UV lights.

Ratings

Pressure

Up to 8 in. wg (2kPa) pressure differential

Velocity

Up to 4,000 fpm (20.3 m/s)

Leakage

Class 1A @ 1 in. wg at -40°F (Class 1A @ .25 kPa at -40°C) Class 1 @ 4 in. wg at -40°F (Class 1 @ 4 in. wg at -40°C)

Temperature

-70°F to 200°F (-56°C to 93°C)

*W&H dimension furnished approximately 1/4 in. (6mm) undersize.

Construction

	Standard	Optional	
Frame Material	Aluminum (6	063T5)	
Frame Thickness	.125 in. (3	.2mm)	
Frame Type	5 in. x 1 in. (127mm x 25mm) Hat Channel	Single Flange, Reverse Flange, Quick Connect	
Blade Action	Opposed	Parallel	
Blade Material	Extruded Aluminum (6063T5)		
Blade Type	Insulated Thermally Broken Airfoil		
Linkage	Plated Steel Out of Airstream 316SS		
Axle Bearings	Synthetic	-	
Axle Material	Plated Steel	316SS	
Blade Seals	Silicone	-	
Jamb Seals	Stainless Steel	Silicone	

Size Limitations

in. (mm) W x H		Frame Type			
		Channel, Single or Reverse Flange		Quick Connect	
Blade Action		Parallel	Opposed	Parallel	Opposed
Min.	Internal Mount	8 x 8 (203 x 203)	8 x 8 (203 x 203)		-
Size	External Mount	8 x 7 (203 x 178)	8 x 7 (203 x 178)	8 × 6 (203 × 152)	8 x 6 (203 x 152)
Max.	Single Section	60 in. W x 78 in. H (1524 x 1981) 180 in. W x 156 in. H (4572 x 3962)			x 76 in. H x 1930)
Size	Multi- Section				x 152 in. H x 3861)

Actuator Sizing:

- Factory supplied actuator are sized for a full-open velocity of 1500 fpm (7 m/s) and fully-closed differential pressure of 2 in. wg (.5 kPa)
- Actuators supplied in the field for applications at velocities of 1500 fpm (7 m/s) or less and 2 in. wg of pressure or less shall use the following auidelines:
- Opposed blade dampers: 7 in-lb per square foot o damper area with a minimum of 60 in-lb
- Parallel blade dampers: 9 in-lb per square foot of damper area with a minimum of 60 in-lb
- · Contact factory for actuator sizing on applications exceeding those limits

Options and Accessories

- Actuator: bracket only, manual quadrant, variety of 24V, 120V, 230V actuators
- Actuator mounting; external and external kit
- Clean wrap
- NEMA enclosures
- 120V to 24V Transformer
- Multi-Voltage Transformer

Blade Operation

Frame/Flange Options

 * Width and height is based on outside dimension. W & H dimensions furnished approximately $\frac{1}{4}$ in. (6mm) undersize.

Quick Connect

Note: When ordering the Quick Connect Frame, size is based on duct size (or inside dimension of the damper frame). Quick Connect frame is actual size.

Leakage

AMCA Certified Leakage Data

Air leakage is based on operation between 32°F (0°C) and 120°F (49°C).

Tested for leakage in accordance with ANSI/AMCA Standard 500-D, Figure 5.5.

Tested for air performance in accordance with ANSI/AMCA Standard 500-D, Figures 5.2, 5.3 and 5.5.

Torque

Data are based on a torque of 9.0 in. lb./ft 2 (1.02 N·m) applied to close and seat the damper during the test.

ICD-44	Leakage Class*		
Maximum Damper Width	1 in. wg (0.25 kPa)	4 in. wg (1 kPa)	8 in. wg (2 kPa)
60 in. (1524mm)	1A	1	1

*Leakage Class Definitions

The maximum allowable leakage is defined by AMCA as the following:

- Leakage Class 1A 3 cfm/ft2 @ 1 in. wg (class 1A is only defined at 1 in. wg).
- Leakage Class 1
 - 4 cfm/ft2 @ 1 in. wg
 - 8 cfm/ft2 @ 4 in. wg
 - 11 cfm/ft2 @ 8 in. wg
 - 12.6 cfm/ft2 @ 10 in. wg

AMCA Certified Energy Efficiency Performance

Greenheck Model ICD-44 has a Thermal Efficiency Ratio of 593%.

A damper's Thermal Efficiency Ratio (E) is a comparison of the thermal performance of the tested damper with that of a standard reference damper, which is a 3V blade damper with blade and jamb seals. A damper with the same thermal efficiency as the reference damper would have an E of 0%. A damper that is twice as efficient as the reference damper would have an E of 100%.

Test Information

Testing was conducted on a 36 in. x 36 in. (914mm x 914mm) sample in AMCA 500-D figure 5.10 per AMCA standard 500-D's Thermal Efficiency test.

Torque

Data are based on a torque of 9.0 in.lb./ft² (0.56 N·m) applied to close and seat the damper during the test.

Plenum Wall Installation

There are applications that require mounting an ICD-44 into a plenum wall. This illustration depicts how to mount an ICD-44 into a plenum wall.

Multi-Section Dampers

Dampers larger than the maximum single section size, will be made up of a multiple of equal size sections. Multiple section dampers can be jackshafted together so that all sections operate together as shown below.

NOTE: Dampers larger than 60 in. x78 in. (1524mm x 1981mm) are not intended to be structurally self supporting. Additional horizontal bracing is recommended to support the weight of the damper and vertical bracing should be installed as required to hold against system pressure.
